SUMMARY:

Software QA Engineer with expertise in Manual, Automation, API and Database Testing, experienced in leading Automation Testing Team.

TECHNICAL SKILLS:

- **Manual Testing**
- **Automation Testing** : Cypress, JavaScript, Mocha, Chai, Cypress Cloud, Git, GitHub, Github Actions
- **API Testing** : Postman, Swagger, Cypress

EXPERIENCE:

Software QA Engineer - Azeus Convene | January 2023 - Present

- Designed and implemented a Cypress UI and API Automation Framework that reduced manual regression testing effort by 40%.
- Defined and authored the Dev Standards Document to streamline Cypress automation best practices across the QA team.
- Executed cross-platform testing (Windows, Mac, Android, iOS, Web) ensuring high-quality releases across devices.
- Conducted API automation and validation using Postman, improving API defect detection rate by 30%.
- Performed database testing using SQuirreL SQL Client to ensure backend data consistency and integrity.
- Utilized Git and GitHub for version control and CI/CD pipeline integration, enhancing test automation efficiency.

Quality Analyst - Savior Marketing | September 2021 - December 2022

- Tested 150+ websites and web applications, ensuring UI consistency, responsiveness, and functional stability.
- Developed and maintained a Cypress Automation Framework to accelerate regression test cycles.
- Conducted Accessibility Testing for all delivered websites using WAVE, NVDA, and Chrome DevTools, ensuring WCAG compliance.
- Improved cross-browser/device coverage by integrating LambdaTest into the testing process.

Software QA - Engenia Technologies | August 2020 - August 2021

- Performed functional, integration, and system testing for 5 enterprise applications across web, Android, and iOS.
- Conducted API testing using Swagger, ensuring proper backend functionality and API reliability.
- Delivered client -facing artifacts including Test Execution Reports, Traceability Matrices, and Tutorial Documents.
- Used Jira for defect tracking and test cycle management, improving defect resolution workflow.

Management Engineer - Consultadd Services | February 2019 - November 2019

INTERNSHIP:

Software QA Intern - Azeus Convene | April 2020 - July 2020

- Tested 4 mobile and web applications, ensuring functional stability and usability across platforms.
- Performed mobile app testing on real devices via BrowserStack for Android and iOS platforms.
- Authored and executed detailed test cases, improving overall test coverage.
- Conducted API validation using Postman, identifying critical integration bugs early in SDLC.

EDUCATION:

Noida Institute of Engineering and Technology, Noida, UP | B.Tech | AUG 2015 - MAY 2019
